CUSTOMER SUCCESS STORY

PeopleReady helps power large-scale veteran housing transformation with reliable on-site temporary staffing support

CHALLENGE

More than 32,000 veterans experience homelessness on any given night, highlighting the need for safe, stable housing. In Arizona, The Home Depot Foundation partnered with a local nonprofit to transform a former Holiday Inn into a housing community for veterans.

The renovation required extensive indoor and outdoor work, including landscaping, loading and unloading materials, cleaning, furniture assembly and general labor. With hundreds of volunteers participating, The Home Depot Foundation needed dependable temporary workers to support the fast-moving project.

SOLUTION

PeopleReady used its local recruiting network, on-demand staffing capabilities and on-site support to quickly provide qualified W-2, E-Verified workers for two Arizona renovation sites. All workers met required background screening standards and wore a consistent event uniform.

Approximately 20 PeopleReady workers supported each location, working alongside volunteer groups of 450 people at one site and 280 at another across four consecutive days. PeopleReady also managed attendance, monitored coverage and addressed last-minute staffing needs to keep work moving without disruption.

RESULTS

Together, the now four-year partnership delivered:

- 2 large-scale veteran housing facilities and a city park improved
- 400+ veterans and first responders housed or supported
- 2,800 total volunteer hours contributed
- 500,000+ square feet renovated in Phoenix, AZ

Gabriel Sneller, Manager of Foundation Projects at The Home Depot Foundation, said:

"PeopleReady is an invaluable partner... Their team provides the skilled, reliable workforce and on-the-ground leadership that allows us to take an ambitious project involving hundreds of volunteers and execute it safely, efficiently and at scale."

Across similar projects, PeopleReady has supported 1.2K+ associates and more than 23K total hours worked.
